KCC TECHNICAL · PRODUCTION & TECHNICAL

# Switching to the new KCC Technical

What changes, what stays the same, and what to do on your first day. A short guide for the whole crew.

For all crew

2027 edition · written for the revamped app. Screens show sample crew and gear, not real people. If something on your screen looks different, the app may have been updated since this was printed.

# Contents

1. What is changing

2. Before launch day

3. Your first sign-in

4. The welcome lesson

5. What is new for the crew

6. If something goes wrong

7. For admins: launch day checklist

# 1. What is changing

The team is moving to a new version of KCC Technical. It does the same job as before: who is on which station, what to check before the doors open, which gear is broken, and who has borrowed what. It is faster, works better on phones, and has some new tools for the crew.

- **Your name and your schedule stay.** Your crew profile, your station history and the gear list are carried over.
- **Your password stays** if you already had one. If you never had a password, you will be given a temporary one (see the next section).
- **Everyone completes a short welcome lesson** the first time they sign in. It takes about ten minutes. Until it is done, the rest of the app stays locked.

> **TIP**
> You do not need to install anything. Open the new address in your browser. You can add it to your phone's home screen later (section 3).

# 2. Before launch day

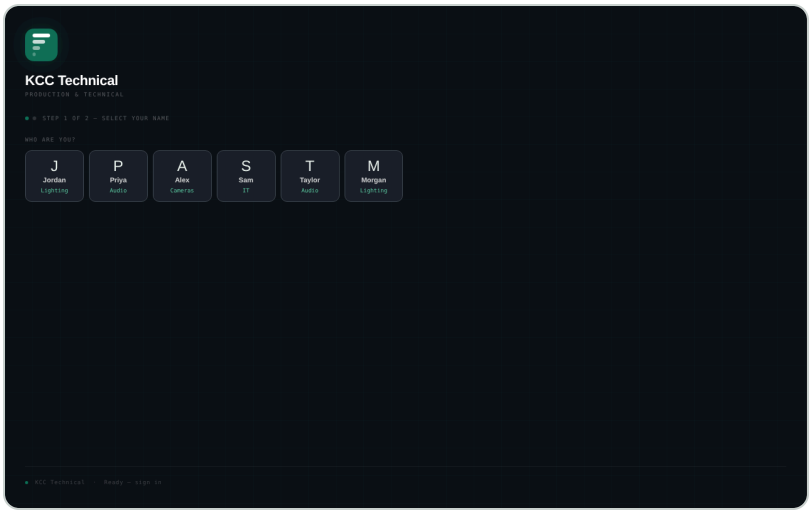

Before the switch you will get an **email from the Video team**. Check your inbox and your spam folder. It tells you the new address, the date, and one of two things:

| If you already had a password | If you never had one |
|---|---|
| Nothing changes. Sign in with the password you always used. | The email includes a **temporary password**. Use it once, then change it (section 3). |

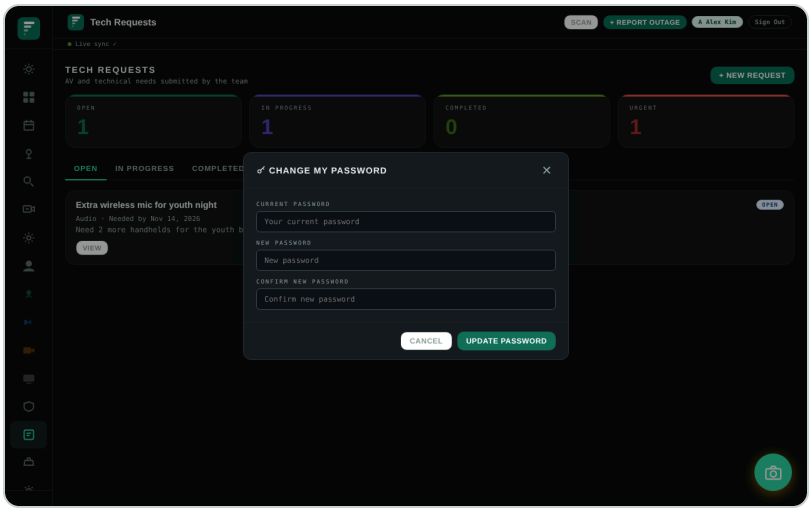

> **NOTE**
> Your email address must be on your profile to receive this. If you did not get an email, tell an admin and they will check your profile and send it again.

# 3. Your first sign-in

1. Open the new address from your email.
2. You see a grid of crew names. **Tap yours.**
3. Type your password and tap the sign-in button.
4. If you used a temporary password: open **Settings → My account → Change my password** and choose your own (at least 8 characters).

The sign-in screen. Tap your name first, then enter your password.

Change my password, under your account settings.

## Put it on your phone

1. Open the address in your phone's browser.
2. **iPhone:** tap Share, then **Add to Home Screen**. **Android:** tap the browser menu, then **Install app** or **Add to Home screen**.
3. Open it from the new icon. It opens full screen like any other app.

> **CAREFUL**
>
> After five wrong passwords in a row the account locks for a minute, then longer if it keeps happening. Wait and try again, or ask an admin to reset your password.

# 4. The welcome lesson

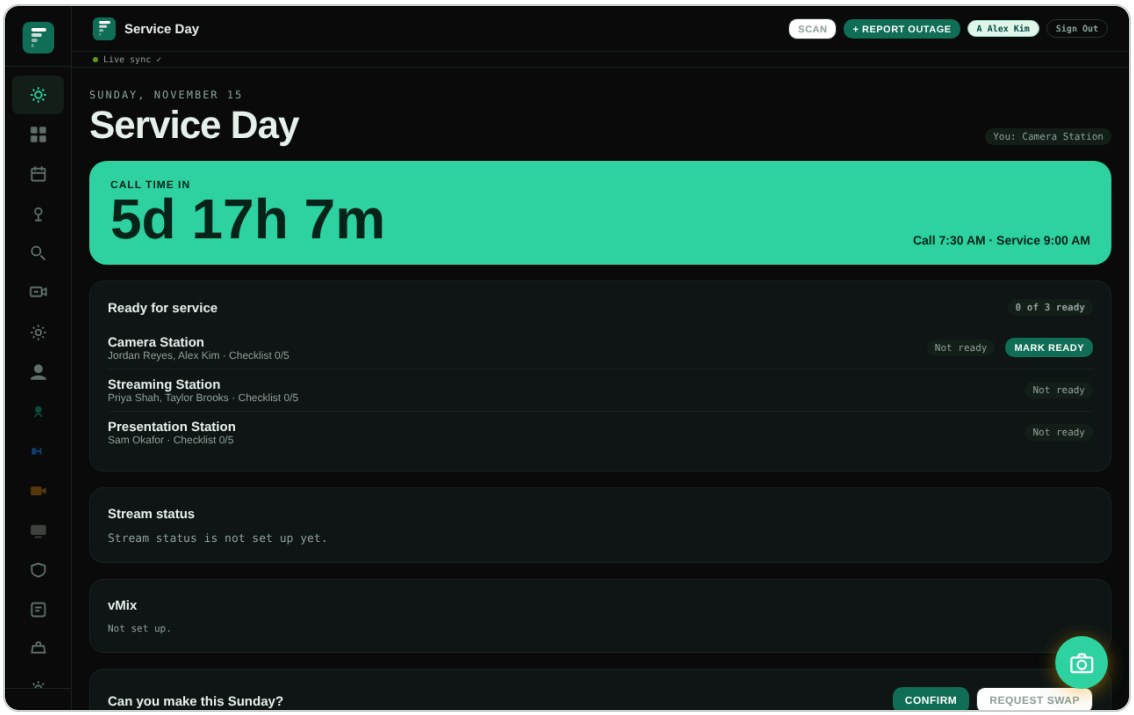

The first time you sign in, the app opens **Training** and shows the module **Welcome to the new KCC Technical**. Everything else is locked until you finish it. This is on purpose: everyone starts the new system knowing the basics.

1. Open the module and read the guides it links to (this guide and the Crew Guide).
2. Tap **Take the quiz**. It has a few short questions about signing in, your station, scanning and reporting a problem.
3. Pass mark is 80%. If you miss it, you can try again straight away.
4. When you pass, the lock lifts and the whole app opens.

> **TIP**
> Your admins can see who has finished. If you are stuck, ask one of them. They can help you in person on Sunday.

# 5. What is new for the crew

| What | Where to find it |
|---|---|
| **Service Day**: your station, call time (9:00) and service time (10:30), the checklist for your station, and your station's training manual. | First page after you sign in |
| **Stations**: Camera, Sound, Lights, Presentation, Streaming and Standby. **Sound is limited to people who are approved** for it. | Schedule and Service Day |
| **Training**: modules with manuals, a short quiz, and a practical test where an admin watches you do the job. | Training in the menu |
| **Scan**: scan a fixture or gear QR label to open it, report a problem, or check gear out and back. | Scan button, top right |
| **Time off**: add dates you are away. You are marked unavailable for those Sundays. | Crew → Sunday Availability |
| **Offline**: if your connection drops, keep working. Changes are sent when you are back online. | Automatic |

Service Day.

# 6. If something goes wrong

| Problem | Try this |
|---|---|
| I did not get the email | Check spam. Then ask an admin to confirm your email address on your profile and resend it. |
| My name is not in the grid | Tell an admin. They may need to mark you active. |
| My password does not work | Retype it carefully. If it still fails, ask an admin to reset it with the key button on your card. |
| The app is locked on Training | That is the welcome lesson. Pass the quiz to unlock the rest. |
| The page looks old or stuck | Close it and open it again. It refreshes itself when it has a connection. |

# 7. For admins: launch day checklist

1. **Back up the old app.** Log in as master admin and click 💾 **Backup** at the bottom-right. Keep the file private.

2. **Run the migration** (your developer does this). Copy the list of temporary passwords it prints. It is shown only once.
3. **Check everyone has an email** on their profile (Crew page).
4. In **Settings → Launch email**, paste the temporary passwords, check the preview, and tap **Send to everyone**. Anyone not sent shows in red so you can fix and resend.
5. In the same card, tap **Make the welcome lesson mandatory**. This adds the module and locks the app until each person passes it.
6. Watch **Training** to see who has finished. Help anyone who is stuck.

> **TIP**
>
> Do the email and the mandatory lesson together on launch day, so nobody opens the app before they have been told what to expect.
